

## **Estelle Devillard**

Dr. Estelle Devillard received a PhD in Microbiology in 2000, from Universities of Clermont-Ferrand (France) and Aberdeen (UK), studying fiber degrading enzymes from rumen protozoa. Completed post-doctoral fellowships at Ohio State University (USA) and Lawson Health Research Institute (Canada) where she developed her skills in digestive microbiology, microbial ecology and probiotic applications. In 2003, she was appointed at the Rowett Research Institute in UK where her work focused on intestinal bacteria and their role in preventing inflammatory diseases and cancers. In 2007, she joined Adisseo in Commeny, France, to initiate and develop the R&D programs relative to gut health, and the interaction between nutrition and health. As Manager of the Scientific team of Adisseo Nutrition R&D, she is now developing innovation projects on digestive health issues as well as reinforcing the knowledge on their mode of actions.
